The Archaeology of Knowledge. The Archeology of Knowledge is Foucault's attempt, after the fact, to describe theoretically the method he used in his first three books of history (Madness and Civilization,The Birth of the Clinic, and The Order of Things). This is, then, not the presentation of a formal theory built logically from axioms, but a description of a specific kind of approach to history (a 'way of speaking' about history).

The Archaeology of Knowledge: General Summary | SparkNotes

The Archaeology of Knowledge is Foucault's statement on historiography: how to do history. Over the course of five Parts, Foucault explains how he has been doing history, in particular how he has constructed a history of social structures by way of "discourse," or the statements left in the historical record.

The Archaeology of Knowledge Summary | GradeSaver

Foucault begins The Archaeology of Knowledge by considering two competing tendencies in the work of contemporary historians. Historians who study ideas and knowledge—how different concepts emerge and spread—tend to study discontinuity: the sudden appearance of new, unexpected ideas. In contrast, historians who study more traditional topics like material things and political events, tend to study continuity: how a stable structure or narrative underlies a series of events.
