Artificial Intelligence, Biotech, etc.) (Watch this short video)The mission of the Center for Curriculum Redesign (CCR) is to answer this timely question, and openly propagate its recommendations and frameworks on a worldwide basis.

Center for Curriculum Redesign

Artificial intelligence (AI), is intelligence demonstrated by machines, unlike the natural intelligence displayed by humans and animals. Leading AI textbooks define the field as the study of "intelligent agents": any device that perceives its environment and takes actions that maximize its chance of successfully achieving its goals. Colloquially, the term "artificial intelligence" is often used ...

Artificial intelligence - Wikipedia

In the 20th century, oil enabled mobility through vehicles with the internal combustion engine. In the 21st century, data is delivering intelligence and insights to a new generation of vehicles as part of smart city planning."

Lachlan Colquhoun: The IoT Revolution of Living | IoT Council

Artificial general intelligence (or "AGI") is a program which can apply intelligence to a wide variety of problems, in much the same ways humans can. Ben Goertzel and others argued in the early 2000s that AI research had largely given up on the field's original goal of creating artificial general intelligence.
