Scatter Plot Data Sheet Based on the work of P. Touchette, R. MacDonald, and S. Langer (1985) A scatter plot can help to identify the patterns of responding in natural settings. Severe problems often occur in short bursts of responding alternating with periods of no responding. Line graphs illustrate this frequency well.

If you are going to make a scatter plot by hand, then things are a bit more elaborated: You need to deal with the corresponding x and y axes, and their corresponding scales. Then, you need to identify each pair  $((X, Y))$ , and locate it on the plane, respecting the corresponding scale defined for each of the axes.
