[EPUB] Boeing 777 200 Management Reference Guide

The first 777-200IGW/ER was delivered to British Airways in February 1997. The 777-100X was a proposed shortened ultra long range (16,000km/8635nm) model, dropped in favour of the 777-200LR (originally 777-200X) design study. Boeing claims the 777-200LR will be the longest ranging airliner, capable of flying 16,417km (8865nm) - 18 hours flying ...

Boeing 777-200 - Airliners.net

The B-777 airplane sensors, which measure vertical, lateral, and longitudinal acceleration, are located in the cockpit area. The estimates of the center of gravity (c.g.) accelerations are computed in the Air Data Inertial Reference Unit, which converts the measured crew station accelerations to accelerations at the c.g.
