The Transit Level - Bob Vila

Transit levels use a telescope to find a level line across a long distance. Survey transit leveling is a common option for landscaping, construction and surveying. There are many different types of transit levels, but most use a tripod base, calibrated rod and eyepiece. What Is the

Direct her to raise or lower the receiver on the grade rod. When the receiver is at elevation with the laser level's eye, it delivers a constant beep. If the receiver is too high or low on the grade rod, the beep is broken with intervals of silence. For a transit, simply read the elevation on the rod through the transit and record the value.
