Critical Care Transport 2nd Edition PDF

Critical Care Transport provides ventilator, infusion pumps, and invasive pressure monitoring capabilities which allows patients to be moved between facilities without reducing therapy or decreasing hospital staff from a local hospital. The CCT unit is staffed with a critical care nurse, paramedic, and EMT.

Our Services

The provision of medical care by a critical care transport team to a patient requiring critical care transport by a critical care transport agency such that the failure to assess/recognize resuscitation needs and urgently initiate and maintain acute medical diagnostics and/or interventions, pharmacological interventions, or technologies would likely result in sudden, clinically significant or life threatening deterioration in the patient's condition.

Critical Care Transport Standards

INTRAHOSPITAL TRANSPORT Because the transport of critically ill patients to procedures or tests outside the intensive care unit is potentially hazardous, the transport process must be organized and efficient.

Amazon.com: Customer reviews: Critical Care Transport by ...

I bought this book for help with transitioning from critical care nursing to the transport environment; for that purpose, it seems inadequate. While it does cover critical care topics, it approaches them from a very introductory level and does little to aid in adapting in-hospital methods to the transport world.
