CucumberStudio Documentation | CucumberStudio Documentation

documentation, automated tests, and a development aid – all in one. So what does Cucumber do? It can be described in the following steps: Cucumber reads the code written in plain English text (Language Gherkin – to be introduced later in this tutorial) in the feature file (to be introduced later).

AbouttheTutorial - tutorialspoint.com

Testwise Cucumber is a framework that understands Gherkin and runs the automated tests. It sounds like a fairy tale, you get your documentation described in Gherkin and tests just run. Actually, it is not that simple, each step from documentation should have underlying test code that manipulates the application and should have test conditions.
