Reference design criteria requires 72 measurements, taken 360 degrees around the speaker, yielding 1,200 times more data. This data is used in the design of critical system components, enabling JBL to engineer complete systems that deliver smooth off-axis response. The result: clear, accurate sound at the listening position in any room.

The latest step in the evolution of car audio is the rise in prominence of branded premium surround sound systems. Car makers partner with high-end audio brands to offer premium sound systems tailored to their vehicles. Toyota and JBL have taken a deeper dive together with the infotainment system in the new 2019 Avalon. The two companies recently invited a group of journalists for a rare tour of the Toyota Motor North America Research & Development campus in York Township, Michigan followed ...
