or gamepad instead of an RC Transmitter. Flying with a Joystick (or virtual thumb-sticks) requires a reliable high bandwidth telemetry channel to ensure that the vehicle is responsive to joystick movements (because joystick information is sent over MAVLink).

## **Joystick · QGroundControl User Guide**

A computer joystick or gamepad connected through QGroundControl can be used to manually control the vehicle (instead of using an RC Transmitter). This approach may be used by manual control units that have an integrated ground control station (like the UAV Components MicroNav shown below).
