Many owners give the following tip: when the tractor's engine is started, press the AUTO REGEN switch. Your auto regeneration feature is now on. You are free to go about your work, and the DPF will automatically recondition. Keeping the RPM up at all times (about 1900 - 2000) will keep the engine temps high enough to aid DPF regeneration.

Kubota DPF Reconditioning - Bobby Ford Tractor & Equipment

An emissions related check engine light could be caused by a loose gas cap at the gas tank, or a leaking evaporative system charcoal canister under the hood. Likewise, something as simple as a malfunctioning fuel pressure regulator or throttle position sensor can cause fuel system havoc.
