In the lean production version, a reworking of the differences of a product is predefined so that the product is produced economically. The agile development process, however, focuses on enhancing the product through constant reworking and feedback. Interestingly, the lean model was born out of the industrial production world, while the agile mindset grew from the creative software realm. No haste, no waste. In both models, procedures must be applied, so that waste is eliminated — no haste ...

Lean vs Agile | What is the difference between the two?

In the worst of cases, each discipline on these teams -- product management, design, and software engineering -- learns a different model. This short, tactical book reconciles the perceived differences in Lean Startup, Design Thinking, and Agile software development by focusing not on rituals and practices but on the values that underpin all three methods.
