It was about this time also that Freud began his own self-analysis in which he meticulously analysed his dreams in light of unconscious processes culminating in his next major work "The Interpretation of Dreams" (1901). Freud had by now also developed his therapeutic technique of free association and was no longer practicing hypnosis. From this he went on to explore the influence of unconscious thought processes on various aspects of human behaviour and felt that amongst these forces the ...

Sigmund Freud Today. Like the rest of us, Freud was a story-teller and, just like the rest of us, he believed in his stories, as did others. It's hard, even impossible, to come up with a truly unique narrative about human behavior, but Freud certainly integrated many existing ideas and presented them in a unique way.
