Mild. Most people with psoriasis have it to this degree. Mild cases affect less than 3% of your body (your palm is about 1%). You might have a few lesions scattered on your arms and legs.

**Your Psoriasis: Is It Mild, Moderate, or Severe?**  
With 4,500 mild, 3,000 moderate, and 1,000 severe psoriasis cases and baseline co-morbidity prevalence of 3%, we estimated to have 80% power in detecting increased co-morbidity prevalence odds ratios of 1.29, 1.36, and 1.70 for mild, moderate, and severe psoriasis, respectively, in two-sided tests at a significance level of 0.05.

**Psoriasis severity and the prevalence of major medical co ...**  
Introduction: The Psoriasis Area Severity Index (PASI) is the most widely used scale for assessing the severity of psoriasis and for therapeutic decision making. On the basis of the PASI score, patients have been stratified into 2 groups: mild disease and moderate-to-severe disease. Objective: To draft a proposal for the definition and characterization of moderate psoriasis based on PASI and ...

**Moderate Psoriasis: A Proposed Definition**  
Psoriasis can show up anywhere — on the eyelids, ears, mouth and lips, skin folds, hands and feet, and nails. In mild cases, it may cause patches of dry, itchy skin on your scalp. In severe cases,...

**Facts and Statistics About Psoriasis**  
Finding the right treatment for psoriasis and psoriatic arthritis (PsA) can be complicated. You can find that treatment with the help of your health care provider, whether it's your primary care physician or a specialist such as a dermatologist or a rheumatologist. You can also contact our Patient Navigation Center for help in finding a provider.

**National Psoriasis Foundation: Treatment & Care**  
Psoriasis is a chronic skin condition characterized by thick, raised red patches that are often covered with flaking, silvery scales. The cause of this skin condition is not known, but may be a combination of heredity and immune system response. It i...

**Psoriasis: More than skin deep - Harvard Health**  
You will partner with your dermatologist, who will evaluate your severity by taking several factors into account, such as what percentage of your body is covered in plaques, to determine the severity of your psoriasis and develop a treatment plan. Several factors go into determining whether your psoriasis is mild, moderate, or severe:

**Do I Have Mild, Moderate, or Severe Psoriasis ...**  
Mild to moderate psoriasis is when plaques cover less than 5 percent of your body surface area. Psoriatic plaques look like raised surfaces with a silvery cover of dead skin cells. These are called...
