Your care team helps treat pain, shortness of breath, fatigue, constipation, nausea, loss of appetite, sleep problems, side effects from treatments and other symptoms.

Palliative Care | At Home Care | Spectrum Health

The most important words in your life: palliative care. From what angle do you base your understanding? From the view of the doctor's and family members or the view of the patient? It's easy to become solely focused on easing the suffering a patient or a loved one may be experiencing, instead of framing care around their comfort and dignity.

However, when we understand the effects of a disease, its interventions, and know patients' care goals, we can be better patient advocates across the spectrum of care. We can serve as nurse leaders on an inter-professional team to manage patient and family care and help patients and their loved ones cope with the disease process.

Frequently Asked Questions About Palliative Care

Palliative care is appropriate for individuals with serious illnesses across the age spectrum and can be provided as the main goal of care or in tandem with curative treatment.

Palliative care - Wikipedia

Palliative care encompasses chronic and terminal disease management, pain and symptom management, excellent communication strategies, goals setting and end-of-life therapies. Because the nurse's role in each of these areas is crucial, this seminar will help prepare the nurse to provide effective palliative care.
