Penrose (1959) The Theory of the Growth of the Firm

This book discusses the development of a theory on the growth of the firm. It is shown that the resources with which a particular firm is accustomed to working will shape the productive services its management is capable of rendering.

Theory of the Growth of the Firm - Oxford Scholarship

In Penrose's (1959) theory of efficient management of firms' resources, a key proactive role is assigned to managers in perceiving and pursuing productive opportunities. In a dynamic environment, managers can change both the productive services resources render and the demand conditions that affect its productive opportunities (Penrose, 1959 , pp. 5, 31, 80).

Sir Roger Penrose: An Alternate Theory of the Big Bang?

However, Penrose, based at the University of Oxford, has developed a rival theory known as "conformal cyclic cosmology" (CCC) which posits that the universe became uniform before, rather than after, the Big Bang. The idea is that the universe cycles from one aeon to the next, each time starting out infinitely small and ultra-smooth before ...

Terrell rotation or Terrell effect is the visual distortion that a passing object would appear to undergo, according to the special theory of relativity if it were travelling a significant fraction of the speed of light. This behaviour was described independently by both James Terrell and Roger Penrose in pieces published in 1959, though the general phenomenon was noted already in 1924 by ...

Resource-based view of the firm - IS Theory

Penrose, Edith T. (1914–1996) book (1959) provides a theory of the growth of the firm, maintaining that the binding constraint on the rate of the growth of the firm arises from the limited capacities of its existing management. This managerial constraint on the rate of growth of the firm is known as the Penrose effect.
