Systems use a swivel system which connects the Pipeline End and Manifold (PLEM) to the buoy. The product swivel system provides flexibility of movement to the tankers during transfer of products. This movable pipe-connection system prevents premature hose failure due to traction or bending stresses.

Operations A Single Point Mooring Buoy consists of a buoy that is permanently moored to the seabed by means of multiple mooring lines/anchors/chains allowing cargo transfer of liquid petroleum products. The buoy contains a bearing system that allows a part of it to rotate around the moored geostatic part.
