The equations
Page 11/28

Download Free Solutions

governing the individual particles are $\dot{p}_1 = F(e)_1 + F_{21}$
 $\dot{p}_2 = F(e)_2 + F_{12}$ Assuming the equation of motion to be true, then $\dot{p}_1 + \dot{p}_2 = F(e)_1 + F_{21} + F(e)_2 + F_{12}$ must give $F_{12} + F_{21} = 0$ Thus $F_{12} = -F_{21}$ and they are equal and opposite and satisfy the weak law of action and reaction.

Goldstein - [PDF Document]

The course I took covered Lagrangian and Hamiltonian mechanics and also covered Poisson brackets and the Hamilton-Jacobi formulation. I found the book *Introductory Classical Mechanics* by David Morin to be useful and have many problems with detailed solutions for it. It was especially useful for
