## Vectra Engine Timing

A full timing belt replacement guide for a Vauxhall Vectra 1.8 VVTI model The Vauxhall Vectra has been a popular car on our roads ever since it was first launched in 1995. The recommended timing belt change interval is every 100,000 miles or 10 years and the engine has been identified as an interference type engine so, in the event of the timing belt failing, engine damage may occur.

Your timing belt should be replaced every 50,000–70,000 miles, depending on your car's make and model. Also, make sure you understand if your engine is an interference engine or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the timing belt keeps them from touching. This is why you'll ...

February 11, 2019 by Jason The Opel Vectra utilizes a crankshaft position sensor in order to regulate the engine timing. This sensor uses a reluctor to gauge the position of the crank. When the Vectra's ECM determines that there is an issue with the signal coming from this sensor, it'll throw the P0335 trouble code.
